

EXECUTIVE SUMMARY - 2026

A new telecom revenue layer for Android apps.

Turning mobile apps into a new telecom revenue layer.

jingleplugin.com

Interconnected with IDT Corporation · PCCW Global · Lebara · World Mobile · +5 more

Minutes Network FZ-LLC · Ras Al Khaimah, UAE · Licence No. 47016932 · Confidential

A \$47.9B market your app can tap at zero upfront cost.

Jingle is an Android plug-in that routes international calls through opted-in users' devices over the Minutes Network carrier backbone. App partners keep **50% of net termination revenue** - zero upfront cost, stacking with ads, IAP, and subscriptions.

\$47.9B → \$119.45B

12.1% CAGR 2025–2033 (SkyQuest Research)

58.5% of VoIP revenue is international minutes (Market.us)

4.69B smartphones worldwide (2025) (Statista)

\$613B app economy incl. advertising (2025) (Statista)

TOTAL USERS	MONTHLY	ANNUAL
100K	\$4.8K	\$57.6K
500K	\$24K	\$288K
1M	\$48K	\$576K
5M	\$240K	\$2.88M
10M	\$480K	\$5.76M

Assumptions (standard app audience): 30% opt-in · 8 avg min/user/mo · \$0.04 avg blended rate (Caribbean \$0.08–\$0.15 · Pakistan \$0.03–\$0.06). Worked illustrations from the stated assumptions, not a forecast or guarantee - every app's results differ with usage, geography and market conditions; your agreement sets the final terms.

Why partners choose Jingle.

International voice carriers

Direct and indirect interconnects with IDT (\$1.2B, NYSE), PCCW Global (5B+ min/yr of its own traffic), Lebara, and World Mobile.

Customer support calling

Your support team calls users in-app via SIP - zero PSTN cost, higher pickup rates.

100% Tier 1 CLI routing

Pure, unblended CLI routes with HD-quality codecs. Core SIP routing has no Google-services dependency; the primary wake path is a foreground service with a UDP wake, with FCM as a fallback.

Live partner portal

Real-time revenue, minutes, opted-in users, call quality, and geographic breakdowns. Exportable reports from day one.

8 permission & consent patterns

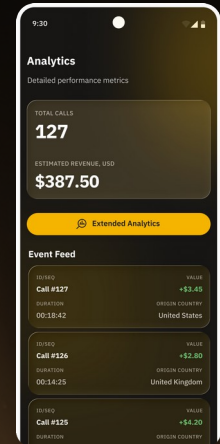

Including the in-app call overlay and support calling. Consent templates, Google Play compliance, Android 14+, Flutter and React Native.

Technical highlights

~30-50KB/min of data, WiFi-only mode, VoIP legal auto-compliance, and transparent settlement with a full audit trail.

100% Tier 1 CLI routing · AI-driven Least Cost Routing · Tier 1 carrier interconnects

Zero upfront cost. Revenue from day one.
